_____ SEVERE PHOTOAGING
_____ ROSACEA
_____ DEHYDRATION
_____ ACNE SCARS
_____ UNBALANCED

PRECAUTIONS (Please Read Carefully)

The treatment you will receive is a clinical treatment designed to exfoliate or remove the outer layers of the skin.

Your participation in your skincare treatments will determine the outcome. It is important that you strictly adhere to your home care products that your aesthetician has recommended.

No guarantee is expressed or implied as to the precise results, peeling times or discomfort.

During the treatment, you may experience some temporary stinging or warm flushing. This will fade within a few minutes. During the next few hours, you may experience some tightening of the skin, which may last for several days.

For most patients, flaking begins within 48 hours. It is impossible to pre-determine how much peeling will occur. The shedding process usually subsides within 5-7 days.

Depending on the clinical peel performed and your skin quality, the following reactions may occur in some patients:
1) Prolonged redness, irritation and flakiness 2) Dryness and sensitivity 3) Severe allergic reactions in rare instances

PLEASE INITIAL (Please Read Carefully)
